To Whom It May Concern:

RE: CENTERPOINT CONSTRUCTION

We have been extremely pleased with Centerpoint Construction's performance on multiple million dollar custom home projects over the last few years. Centerpoint consistently provides top notch experienced superintendents, the highest quality, speed, safety, and professionalism.

Throughout the duration of every project, Centerpoint's commitment and integrity have been without question. Approaching every situation with a solution and professional demeanor, they were able to solve some of the most difficult structural challenges. Their on-site superintendent's work ethic, as well as their safety and quality control, have helped make all of our projects a success.

They are forward thinking, extremely well organized, and highly experienced at building very complicated structures. I would not hesitate to award Centerpoint another subcontract with Onshore Construction.

If you have any questions please do not hesitate to contact me.

Sincerely,

Byran K. Kitchiner
Project Manager
